

A stylized dragonfly logo with a light blue body and translucent wings, positioned behind the main title.

Dragonfly[®]

The Stick-On Electrode

Use with any ET Tube and
EMG nerve monitor

Small size fits easily
into travel case

A photograph of the Dragonfly electrode. It consists of a long, thin, white fabric strip with a rectangular electrode pad at one end. The pad has four gold-colored contact points. A coiled cable with red and blue braided wires connects the electrode to a connector with four colored leads (two red, two blue).

Unique stripes
facilitate placement

25 years of pioneering safe and
convenient Xth nerve monitoring
